

Tell Me About Your Art!

Dear Kindergarten Families:

Today we looked at and painted Lines. We created

STRAIGHT AND CURVED LINES IN PAINT.

Looking: We looked at *Where to Now, St. Peter?* by Juan Alonso, *Echoes* by Harold Balazs, or *Starry Night* by Vincent van Gogh. We found **curved lines** and **straight lines** in the art.

Talking: Where else can you find straight and curved lines all around you?

Making: We painted straight and curved lines in **watercolor**. We already know how to load our brush with water and with paint. Our Studio Tip was to 'swish, swish, swish, swish, pat, pat, pat' in the water and on a paper towel. Then we were ready to dip into the watercolor pan.

Art at Home

Together:

You could use pencils or crayons to draw straight, curved, and jagged/zigzag lines.

Questions to ask:

Where do you see straight lines?

Where do you see curved lines?

Straight and curved lines combine to form all other types of lines.
